

# THE ART OF WAR FOR TEACHERS

by  
Simon Green

**The second edition of The Art of War for Teachers is a handbook of practical wisdom, advice and encouragement for all teachers everywhere.**

Based on the teachings of Sun Tzu, a Chinese philosopher-general in 400 BC, it offers enlightenment on the most intractable problems for all who feel confused or anxious.

Inspirational in tone, down-to-earth in content and witty in many of its aphorisms, this book may well become a standard text for all who are learning to teach, for all who labour to train them and for all who do battle on a daily basis in the field of classroom conflict.
